PROFESSIONAL SUMMARY

Full Stack Engineer experienced in designing and developing scalable web applications across the frontend, backend, database, and deployment layers. Proficient in Next.js, Python, REST APIs and PostgreSQL, with experience building multi-stage LLM applications and production-ready web platforms. Strong background in API design, database integration, reusable architecture, performance optimization, and cloud deployment. Comfortable working across the complete software development life cycle from system design and implementation to testing and deployment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Frontend: Next.js, React.js, Tailwind CSS, Responsive Design, Component-Based Architecture

Backend: Python, Node.js, Express.js, REST APIs, API Design, Authentication, LLM Pipelines

Databases: PostgreSQL, MongoDB, Database Design, CRUD Operations

AI/LLM: LLM Orchestration, Multi-Stage AI Pipelines, Prompt Engineering, Context Engineering, Structured Outputs, AI Agents

Cloud & Tools: Git, GitHub, Vercel, Firebase, Docker, AWS, VS Code, Figma

Concepts: Full Stack Development, System Design, API Integration, Authentication, Performance Optimization, SEO, Web-Assembly

WORK EXPERIENCE

Full Stack Engineer

August 2026 - Present

DignifiedMe Technologies Pvt. Ltd. (Accelix.ai)

Vadodara, India

- Develop and maintain full-stack features for an AI-native electronics product development platform using Next.js, Python, and REST APIs.
- Designed and implemented multi-stage LLM application workflows that orchestrate query refinement, product categorization, competitor discovery, market analysis, PRD, etc generation.
- Developed backend services and API integrations for processing structured AI outputs and passing data between independent application stages.
- Built reusable frontend components and data-driven interfaces in Next.js, integrating backend APIs to deliver end-to-end product workflows.
- Implemented validation, error handling, loading states, and structured API responses to improve application reliability and user experience.

UI/UX - Frontend Engineering Intern

Feb 2026 - July 2026

DignifiedMe Technologies Pvt. Ltd. (Accelix.ai)

Vadodara, India

- Developed responsive production interfaces using Next.js for an AI-native electronics product development platform.
- Converted Figma designs into pixel-perfect and reusable interfaces while maintaining consistency across desktop, tablet, and mobile devices.
- Built reusable React components and layouts that improved development speed and application maintainability.
- Integrated REST APIs and implemented loading, validation, error, and empty states for production workflows.
- Optimized frontend performance using lazy loading, code splitting, component optimization, and efficient rendering techniques.

PROJECTS

Patram PDF — Privacy-First PDF Toolkit

Live Project

HTML, CSS, Javascript, Python, WebAssembly

- Built a privacy-first PDF processing platform where documents are processed locally in the browser without uploading files to a server.
- Developed drag-and-drop workflows for merging, splitting, rotating, compressing, and reorganizing PDF

documents.

- Integrated WebAssembly-based processing to perform computationally intensive PDF operations with near-native performance.

EduChain Lib — Decentralized Educational Library

[Live Project](#)

Vue.js, MongoDB, Solidity, IPFS, Pinata, Foundry

- Built a full-stack decentralized educational content platform combining a Vue.js frontend, Node.js backend, MongoDB Atlas, IPFS, and Solidity smart contracts.
- Developed REST APIs and database models for managing educational content, users, and platform workflows.
- Integrated IPFS through Pinata for decentralized storage of educational resources.
- Implemented blockchain interactions using Solidity smart contracts for content registration, token management, and royalty distribution.
- Developed responsive dashboards for creators and learners with reusable components and API-driven data flows.

Arcadeium - Browser Arcade Platform

[Live Project](#)

JavaScript, HTML5, CSS3

- Designed and developed a browser-based arcade platform featuring multiple classic games with a responsive web interface.
- Built reusable navigation, game menus, scoreboards, and UI components across the platform.
- Integrated browser-based game engines and optimized rendering performance for smooth gameplay across desktop and mobile browsers.

Vision-Based Identity System

[GitHub](#)

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack identity verification platform using the MERN stack with a React-based monitoring dashboard.
- Designed REST APIs using Node.js and Express.js for authentication, identity workflows, and application data management.
- Implemented MongoDB data models and integrated frontend workflows with backend APIs.
- Developed responsive interfaces for monitoring identity verification processes and application states.

EDUCATION

Parul University

Bachelor of Technology in Computer Science Engineering

Vadodara, Gujarat

2022 - 2026
